PROFESSIONAL SUMMARY

Collaborative Full Stack Software Engineer delivering production-ready web and mobile solutions with a proven ability to lead project lifecycles from concept to deployment. Adept at bridging the gap between technical execution and client vision, fostering collaborative environments, and driving team-oriented problem solving. Focused on building responsive applications using the MERN stack, Next.js, and TypeScript, backed by an active portfolio of 60+ GitHub repositories and a strict commitment to clean code architecture.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Redux
Backend	Node.js, Express.js, MongoDB, Oracle, Drizzle ORM, Neon, JWT Auth
Mobile	React Native, Expo
DevOps	GitHub Actions, CI/CD Pipelines, Vercel, Oracle Cloud (OCI), Linux CLI, Nginx, Server Deployment
Tools	Git, GitHub, Jira, Agile, REST APIs

PROFESSIONAL EXPERIENCE

Web Developer (Contract) — Zentrixa Marketing, Karachi 2026

Sole developer responsible for end-to-end delivery of a client-facing marketing platform.

- Engineered and deployed a premium, app-like portfolio website (zentrixmarketing.vercel.app) using Next.js and Tailwind CSS, delivering within agreed deadlines.
- Configured Vercel deployment pipeline with custom domain and SSL, ensuring zero-downtime delivery.
- Managed full client communication cycle, translating non-technical vision into a polished, conversion-focused digital product.

Full Stack Developer — Zarb Official, E-Commerce Platform 2026

Built a full-featured perfume e-commerce platform for a client brand, handling everything from product management to checkout.

- Developed a complete Next.js full-stack application (zarb.store) with server-side rendering, product catalog, cart, and checkout functionality.
- Integrated Drizzle ORM with PostgreSQL (Neon) for product, order, and user data management.
- Implemented Cloudinary for optimized product image storage and delivery.

Full Stack Developer — Exam Attendance System, Sukkur Education Board 2026

Inherited a bare-bones project structure and built the complete application end-to-end for a government education board.

- Developed the entire frontend in React.js from scratch, including attendance dashboards, exam management, and reporting views (attenddx.vercel.app).
- Built the full Node.js and Express.js backend with REST APIs covering attendance tracking, exam scheduling, and student data management.
- Deployed the production application on Vercel with CI/CD pipeline configuration for automated builds.

KEY PROJECTS

Asaan Taqreeb (Event App) — Final Year Project | asaantaqreeb.vercel.app

Cross-platform mobile app for browsing and filtering local event vendors in Karachi, built as academic capstone at SMIU.

- Spearheaded frontend mobile architecture using React Native for a seamless cross-platform experience.
- Engineered and deployed a scalable backend on Oracle Cloud (OCI), managing server provisioning and configuration via Linux CLI.
- Built REST API infrastructure using Node.js, Express.js, and MongoDB with JWT authentication.
- Implemented CI/CD workflow using GitHub Actions for automated builds and deployment checks.

Missing Link (AI Resume Analyzer) — missinlink.vercel.app

AI-powered tool that evaluates resumes against job descriptions, providing ATS scores and missing keyword analysis.

- Engineered the core analysis engine using Next.js, integrating 2 AI APIs (Groq and Gemini) to process complex text inputs.
- Designed and deployed full CI/CD pipeline via Vercel with automatic deployments on every push.

AI Journal App — moodbetav2.vercel.app

Sentiment analysis tool that categorizes journal entries and provides emotional feedback using AI models.

- Built full-stack architecture using Next.js, Drizzle ORM, and Neon serverless database.
- Integrated AI APIs for real-time text analysis and sentiment categorization.

EDUCATION

Bachelor of Science in Software Engineering — SMIU, Karachi 2022 – 2026

Relevant Coursework: Web Engineering, Database Management, Software Design.
